

MAKSYM SKORBATIUK

Senior Full-Stack Web Engineer

(843) 251-4164 | skorbatiuk.m@gmail.com | [LinkedIn](#) | Charlotte, NC | Ready to relocate

SUMMARY

Senior Full-Stack Web Engineer with 8+ years of experience building high-load web applications using PHP/Laravel, Vue.js, JavaScript, TypeScript, and AWS. Collaborated with direct clients, cross-functional teams, and owned feature delivery - translating requirements into technical solutions and shipping stable releases. Green Card holder.

SKILLS

Algorithms, Data Structures, Design Patterns, OOP, System Design, Agile methodologies, PHP, Typescript, Javascript, SQL, AWS (S3, ECR, ECS, RDS, IAM), Jenkins, Docker, GitHub Actions, Bitbucket Pipelines, Node.js, Laravel, PHPUnit, Jest, Vue, Inertia, React, Next.js Redux, Tailwind, Livewire, Redis, Vuetify, Nest.js, GraphQL, Module Federation, Vite, Webpack, TypeORM, MySQL, PostgreSQL, MongoDB, Cursor

EXPERIENCE

Senior Full Stack Web Engineer

Jul 2023 — Present

Lemberg Solutions

Remote

- Designed and implemented 20+ major customer-requested features across frontend and backend, partnering with product and design from discovery through production release.
- Planned and executed a major Laravel framework upgrade, replacing 13 deprecated or unsupported dependencies while maintaining production stability with no service disruptions.
- Championed internal knowledge sharing by delivering 3 technical presentations attended by 20+ engineers, increasing awareness of platform improvements and cross-team collaboration.
- Migrated 15 Laravel Blade pages to a React, modernizing the frontend architecture and improving long-term maintainability.
- Built a Node.js (Express) + Apollo GraphQL microservice to extract groups management functionality from a PHP monolith, enabling independent deployments and reducing release risk for that functionality.
- Maintained and implemented new features on existing Node.js (Apollo GraphQL) microservices.

Senior Full Stack Web Engineer

Mar 2022 — Jul 2023

EPAM

Remote

- Led the database migration for a new app version impacting 1.5M users by designing and executing a multi-stage, idempotent migration, minimizing downtime and release risk.
- Engineered Bitbucket Pipelines-based CI/CD, automating release cuts, pull-request test execution, and deployments to develop and QA environments, accelerating release cycles by 70%.

Full Stack Web Engineer

Oct 2021 — Feb 2022

Easy Agency

Remote

- Refactored 12 legacy Laravel Blade + jQuery pages into Laravel + Vue.js (Inertia), improving UI responsiveness and reducing the time to interactive on high-traffic screens from 10.8s to 3.3s, based on Google Lighthouse audits.
- Created 28 reusable Vue.js components adopted across 12 screens, accelerating new UI delivery and improving consistency across key workflows.

Full Stack Web Engineer

Oct 2021 — Feb 2022

MeetUP IT

Remote

- Implemented video lesson progress tracking (resume playback, completion %, last watched position) across web + API, increasing course completion by 19%.
- Designed and delivered an email + SMS notification system to re-engage learners who paused mid-course, decreasing abandonment by 27% based on a quarter-over-quarter unfinished-course comparison.

Backend Web Engineer

Nov 2017 — Jun 2019

Mobilife+

Remote

- Developed backend APIs for 17 internal admin pages, including a statistics dashboard powered by complex aggregated queries and caching to keep reporting fast and reliable for a site with 40,000+ monthly visitors.
- Collaborated closely with frontend developers on API integration, improving integration reliability and feature delivery efficiency.

EDUCATION

Lutsk National Technical University

Computer Science, Master's Degree
